

# HASOMED RehaMove®

## Movement Therapy with Electrical Stimulation

### Activate muscles despite paralysis and regain quality of life

HASOMED provides one of the leading system for Functional Electrical Stimulation (FES) in the FES Cycling and FES Research market. Regular therapy with FES rebuilds muscle strength, improves your feelings of well-being and helps to avoid secondary diseases, such as spasticity or pressure sores.

### For clients after:

- Spinal Cord Injury
- Stroke
- Traumatic Brain Injury
- Cerebral Palsy
- Multiple Sclerosis

### Benefit from:

- Improving muscle strength
- Increasing cardiovascular system
- Stimulating neural and joint afferences
- Reducing limb spasticity
- Preventing or retarding atrophy
